## DETAILED ACTION

### *1. Lack of Unity*

A. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 8-15 and 19, drawn to a polypeptide, polynucleotide, vector, host cell, methods of making a polypeptide, a method for treating a disorder using a polypeptide and a pharmaceutical composition.

Group II, claim 7, drawn to a method of detecting a polynucleotide.

Group III, claim 16, drawn to an antibody.

Group IV, claim 17, drawn to an agonist of a polypeptide.

Group V, claim 18, drawn to an antagonist of a polypeptide.

Group VI, claim 20, drawn to a method of treating a disorder by administering an antagonist.

The invention listed as Groups I-VI do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature of Group I is a polypeptide. The special technical feature of Group II is a method of detecting a polynucleotide. The special technical feature of Group III is an antibody. The special technical feature of Group IV is an agonist. The special technical feature of Group V is an antagonist. The special technical feature of Group VI is a method of treating a disorder using an antagonist. The special technical feature of each group is not the same, or does not correspond to the special technical feature of any other Group. The products of Groups I, III, IV and V are structurally and functionally distinct, and the methods of Group II and VI require different method steps and reagents for achieving different goals. The Groups are not linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.

**Furthermore, Group I is drawn to 134 independent and distinct polypeptides and corresponding polynucleotides. Therefore, in addition to electing a Group, Applicants are required to elect one polypeptide sequence and its corresponding polynucleotide sequence.**

Art Unit: 1647

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
